

Base12 Fiber Patch Panels

CSD's high-density 1RU Base12 fiber patch panels accommodate up to 12 interchangeable MPO cassettes, providing up to 144 LC fiber terminations / 72 LC duplex ports. CSD's slide-out design ensures easy access to cable for routing and terminations, and rear compartment provide ample storage for cassettes and trunk cables. A 2RU version that accommodates up to 16 cassettes (192 LC fibers/96 LC duplex ports) is also available.

CSD's low-profile 1RU Base12 patch panels are available in (3) styles - accommodating 8 or 12 cassettes - Enclosed Sliding Panel, Fixed Panel with rear cable management, and Fixed Panel w/o rear cable management. Each panel ships from the factory ready-equipped with 19" rack-mountable hardware for quick and easy field installation.
