

Base8 Fiber Patch Panels

CSD's high-density 1RU Base8 fiber patch panels accommodate up to 18 interchangeable MPO cassettes, providing up to 144 LC fiber terminations and 72 LC duplex ports. CSD's slide-out design ensures easy access to cable for routing and terminations, and rear compartment provides ample storage for cassettes and trunks cables.

CSD's low-profile 1RU Base8 is available in (3) styles accommodating - either 12 or 18 cassettes - Enclosed Sliding Panel, Fixed Panel with rear cable management, and Fixed Panel w/o rear cable management. Each panel ships from the factory ready-equipped with 19" rack-mountable hardware for quick and easy field installation.

Features & Benefits

- Full front and rear access solution
- Low-profile, 1RU design
- Holds up to 18 MPO cassettes
- Protects all cassettes and cables
- Easy rack or cabinet installation

Applications

- Data centers
- Mobile switch centers
- Storage area networks

Base8 Fiber Patch Panels
